

# ECOLALA Effect Measurement Experiment

## Experiment Overview

We introduced 3g of ECOLALA CLEAN powder into 300ml of water used to breed aquarium fish, and then measured changes in water quality for one month.  
Experiment Period: 10/21/2015-11/21/2015 Measurement Method: Periodically measured pollution levels using a Lumitester PD-30 and a LuciPac Pen.
